Closing the Cycle with Universal Year 9 Energy

Written by Donetta Huffman

December arrives with the powerful vibration of a Universal Year 9, marking the end of a nine-year cycle. This energy encourages completion, reflection, and release—helping us let go of what no longer serves us so we can prepare for a fresh start ahead.

This month is ideal for looking back over the past nine years and recognizing the lessons, growth, and wisdom gained along the way. It's a time to finish lingering projects, resolve old conflicts, and bring closure to anything that feels incomplete. Transformation flows easily now, supporting inner shifts and personal evolution.

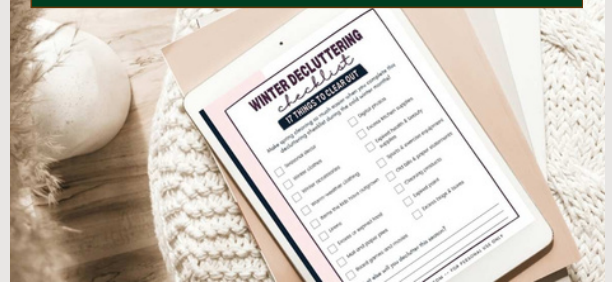

Compassion and healing are key themes, inviting us to approach ourselves and others with empathy. Decluttering—both physically and emotionally—helps clear space for new beginnings. Forgiveness is especially powerful during this period, allowing you to move forward unburdened.

As we wrap up this cycle, December encourages us to prepare for the fresh energy of Year 1. Think of this month as your cosmic clean-up—clearing the path so you can enter the next chapter with clarity, lightness, and renewed purpose.

Here's to finishing strong and stepping into a brighter beginning.

WHAT'S IN THIS MONTH'S ISSUE:

- Closing the Cycle with Universal 9 Energy
- Reflection on My Personal Year 8
- Upcoming Offerings

A Quick Reflection on My Personal Year 8

As many of you know, I love doing year-end sessions—but I also practice what I preach! This past year, I was in a Personal Year 8, a cycle of karma, power, and material achievement. I entered it knowing that the 8 energy rewards past effort, hard work, and disciplined action—and it delivered exactly that.

This year pushed me to stay focused and take responsibility for my choices. I made big moves, including rewriting my Numerology Cards and even renting a brick-and-mortar office—both major steps that required faith, commitment, and consistent effort. The 8 energy brought opportunities in career and finances, but it also reminded me that success only comes with diligence and balanced energy.

My Personal Year 8 has truly been a “Generator Year”—a time of creating real, lasting change and building a stronger foundation for what’s ahead.

Curious what personal year you are entering? Let’s explore your numbers and help you make the most of your upcoming cycle!
